

# Lavenders and Whites with Colored Lip

The response to our recent offer of 1-1/2" pots shifted to 3" pots in fir bark was a tremendous success. Another selection of six outstanding crosses are offered for your consideration.

## the response

### in 3" Pots

Each plant is potted in our specially prepared fir bark. We have added a fungicide to this fir bark, to discourage the growth of disease causing fungi, and also a complete fertilizer, including nitrogen in the form of hoof and horn meal, superphosphate and potash. Our formulation of ingredients in this fertilizer is such that it is gradually released to the plants, thereby making frequent application of fertilizer unnecessary. These seedlings may be left in the 3" pots until they are almost at flowering stage.

### and priced

Shifted into 3" pots, the regular price of R-1805, R-1822, and R-1828 is \$2.55 each. The regular price of R-1830, R-1839 and R-1845 is \$2.80 each. This totals \$16.05, for one each of the six crosses.

We will be happy to select six (6) plants of the crosses you desire, shift them into 3" pots and rush them to you,

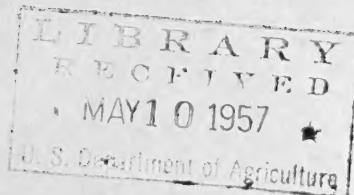

\$16.05 value POSTPAID SPECIAL-DELIVERY for only \$13.95

R-1805      **C. General Gamelin x C. Fabia, var. Red Admiral**      Fabia, a worthy proven breeder, combined with General Gamelin, a choice Fabia offspring -- a regal combination to provide quality cut flower material and a good percentage of exhibitionals for August and September flowering! 6-1/2" to 7" in spread, and of handsome proportions, long-lasting blooms of dark rose to imperial purple are predicted.

R-1822      **Lc. Derrynane x Blc. Molflora, var. Rivermont, AM, AOS**      Here we have combined our long time favorite and pride of the range, Derrynane, with the smaller but very dark and exquisitely proportioned Molflora variety, Rivermont. In 1953, this Molflora received an Award of Merit from the American Orchid Society; this past year it commanded much attention at the Greater North Texas Orchid Society Show and at a recent Oklahoma City meeting, a price of \$1,000 was offered - and rejected - for a division of this superb hybrid! September, October, and November flowering, we expect first class material of wedding bouquet to medium size, 5-1/2" to 6-1/2" in spread.

R-1828      **Lc. Priam x Blc. Molflora, var. Rivermont, AM, AOS**      Here we have combined the very dark and lovely Molflora parent as described in cross R-1822, with another popular and showy wedding bouquet hybrid, Lc. Priam. We anticipate a compact bifoliate grower, emitting lofty spikes gracefully laden with long-lasting, richly colored purples of 5" spread. Late summer through fall flowering.

R-1830      **Slc. Fire Queen, var. Distinction x Slc. Rosamond, var. Westonbirt, AM, RHS**      Quality plus! The large, very dark and elegant Slc. Fire Queen combined with the lovely award winning Rosamond -- a cross guaranteed to glorify any collection! An exceptional cross to provide rich, luxuriant暗 of exhibitional promises -- outstanding form and substance with overlapping sepals and petals, and 6-1/2" to 7" spread!

R-1839      **Lc. Robin Hood, var. John Henry Coats x Lc. Aconcagua, FCC, RHS**      A copious producer of well-proportioned and heavy substanced whites with colored lip. Handsome, snow white sepals and petals with a large and full, slightly ruffled lip tipped with fuchsia, slightly edged with white. A profitable investment for the commercial grower -- and a welcome, eye-commanding addition to the collection of any hobbyist or amateur. 6-1/2" to 7" in spread, flowering in November and December for the Thanksgiving and Christmas holidays.

R-1845      **Lc. Brightling x Pot. Red Friar**      This superb combination of Brightling and Red Friar, characterized by their colorful names, should result in attractive colorations of brick red to deep bishops violet for October, November, through December flowering! Both parents are of exhibitional quality. Well-proportioned blooms of exceptional substance, 6-1/2" to 7-1/2" in spread, with full overlapping sepals and petals and large showy lip may be expected.
